

Liberalize Radio Ownership Rules.

We support Chairman Powell's efforts to bring government communications rules into the 21st Century. Phone, Radio and TV rules from the 1940's don't recognize the impact of cable, statelite TV, STATELITE RADIO, the Internet, WiFi, etc.

We support liberalized radio ownership rules because of all the competing media available from around the world through the Internert and Statelite Radio (which is terrific!).

We also note that while a small percent of owners have the greatest listenership, those owners are only a small percent of the total outlets. This is simply the 20-80 Rule: 20% of any group create 80% of the activity. Statelite Radio and Radio Over the Internet allow any narrow segment of the listening public to find radio stations with content they want from around the USA and the world.

Thank you, Bob & Petra Armour
